Crime Alert Web-Application

Crime alert web-application is a social platform for crimes. Crime alert web-application is a web-app which will provide real-time alerts for crime for registered users using email/SMS.

Registered users will post the crimes around their areas and on that basis web-application will give notification via SMS/email to that areas other registered users.

For example, If a registered user from Ahmedabad post about a robbery case then, all the ahmedabad's registered users will get a notification of that crime.
